Caverion continues partnership with Deggendorf Institute of Technology in Germany

Caverion has won the public tender for the technical and infrastructural facility services at Deggendorf Institute of Technology (DIT). The agreement continues the 25-year partnership with DIT.

During the new agreement period, the focus will be to increase energy efficiency and reduce CO₂ emissions. The DIT buildings contribute to the state of Bavaria achieving its goal of becoming climate neutral by 2040.

Caverion's on-site experts maintain the technical systems of the campus across a total area of almost 45,000 m². "In the last 25 years we have grown together and adapted to the development needs. I am confident about the future and see our buildings in good hands," says Prof. Dr. **Peter Sperber**, President of the DIT.

The state-run Deggendorf Institute of Technology focuses on studies in Business, Engineering, Digitalisation and Healthcare. In addition to the main campus in Deggendorf, there are locations in Cham and Pfarrkirchen. Currently, about 9,000 students attend DIT.
